

# Grazing management field walk

Join the O'Sullivan family and grazing consultant Dick Richardson, Nature's Equity, for a field walk.

## Glenalpine Station, QLD

Friday 5 May 2023

This event is supported by the Stomping Out Sediment project, funded through the Australian Government's Reef Trust.

**Venue:** Glenalpine Station,  
Strathalbyn Rd, near Bowen

**Time:** 8.30am – 12.30pm  
*Morning tea and lunch provided*

**RSVP:** by 1 May 2023

Following a favourable season at Glenalpine, we will undertake forage estimates for the dry season, and discuss the approach Glenalpine takes to dry season grazing planning.

There will be plenty of time in the paddock with Dick, who is always instructive. We will also look at some paddocks which have seen gains in terms of pasture species and biomass production.

This event is funded by Meat & Livestock Australia (MLA). NQ Dry Tropics has partnered with MLA to develop a Producer Demonstration Site to accelerate the adoption of grazing management practices in the Burdekin.
