

Producer Meeting – Grazing management to maximise soil carbon

Soil Carbon to Reach Carbon Neutral

Carrick Research Producer Demonstration Site

 **Thursday 21 March 2024 | Time 7.30 – 9am**

 **Junction Farm, 38 Westwood Road, Carrick, TASMANIA**

This is a COVID-safe event – please do not attend if you are unwell.

Join us for a paddock walk and talk in the MLA Research Producer Demonstration Site at Carrick. Help us to design the grazing management plan to maximise soil carbon.

Marcus and Eleanor James of Junction Farm, are hosting the demonstration site in partnership with MLA and soil carbon provider AgriProve.

The project aims to support red meat producers to understand the impact of soil carbon on the carbon intensity and natural capital of their enterprise. The site will trial multi-species pastures and grazing management approaches to maximise soil carbon.

The MLA PDS project is in early phase development, We invite you to help tailor the project to maximise value and insights for your business.

Approaches to grazing a multi-species pasture

Duncan Farquhar – AgriProve

A facilitated discussion inspecting the multi-species pasture establishment. The objective is to design the grazing plan to maximize soil carbon.

Whole farm natural capital accounting.

Marcus James – Junction Farm

An update on natural capital accounting at Junction Farm.

This event is funded by Meat & Livestock Australia
