

# **Principals of 'Low Cost Beef Production'**

*For north east NSW*

## **Topics and activities:**

- Beef 'cost of production' - what is it and why does it matter?
- The characteristics of low cost / high profit beef businesses
- A real case study - follow the 14 years of financial and production data of an operating beef business to understand how it has achieved a low cost of production and what the implications have been for the business
- Calculate 'cost of production' in your own businesses – completed on day
- A follow-up webinar discussing results and highlighting opportunities for improvement
