

Precision Soil Mapping on Central Victorian Pastures

Beef and sheep producers are invited to join Agriculture Victoria and Precision Agriculture at a field day on precision soil mapping and variable rate fertiliser use in the livestock industry.

This producer demonstration site (PDS) was established in 2021, with funding from Meat & Livestock Australia (MLA). The four demonstration sites are on properties owned by members of the Smeaton and Pyrenees BestWool/BestLamb groups. Results and insights from the three-year demonstration will be presented.

Workshop topics

- Visit one of the project demonstration sites and discuss in field variability of soils and some of the drivers of that variability
- Soil variation at the paddock scale
- Variable rate spreading
- Soil testing and fertility
- Economics of precision soil testing and variable rate spreading.

For information about upcoming workshops, drought conditions or further assistance go to: www.agriculture.vic.gov.au/dryseasons

Date: Friday 11 October

Time: 9.30 am – 12 pm

Where:

- **9:30 – Scott Howell’s – 1504 Amphitheatre Road, Mount Lonarch.**
- **10:30 – Amphitheatre Rec Reserve, School Street, Amphitheatre.**
