

Morven trial site walk

 **1 November 2024 | Time 10:15am - 12.30pm**

 **'Boorook', Thugga Road, Morven NSW 2644 (look for field day signs)**

Free event, all ages welcome, morning tea and lunch provided, shade and toilet available, BYO chair

Join Holbrook Landcare Network for a paddock walk and talk at the Morven trial site.

About the site

Liming treatments were applied at the Morven site in 2019, and grew wheat and canola crops until 2022. In spring 2023 it was sown to various perennial pasture mixes.

Topics for discussion

- **Acid soil management** – What impact has lime had on soil pH since 2019? Findings from other local lime demonstration sites.
- **Serradella for permanent pasture** – Role of serradella, cultivar options, establishment and persistence.
- **High performance pastures** – Examining the effect of liming strategy on spring-sown pastures including lucerne, chicory, phalaris, strawberry clover and serradella.
- **Pasture persistence** – Maximising long-term persistence and production of pastures.

Guest speakers

- Dr Rebecca Haling – CSIRO Agriculture and Food
- Dr Richard Hayes – Senior Research Scientist, NSW DPIRD
- Dr Jason Condon – Associate Professor in Soil Science, CSU
- Nick McGrath – Soils Project Officer, HLN

This event is funded by Meat & Livestock Australia with the support of:
